DATE: April 4, 2011

Introduction

The purpose of this document is to address the comments received on the Draft Camp Johnson Preliminary Assessment/Site Inspection. The North Carolina Department of Environment and Natural Resources (NCDENR) Superfund Section provided the comments listed below. Responses to comments are provided in bold.

NCDENR Comments (dated December 20, 2010)

Specific Comments:

1. Groundwater soil Samples are discussed in the paragraph near the bottom of page iv. Please make the appropriate corrections.

The appropriate changes have been made to the final report.

2. "L" is not defined in the sentence at the top of page 5-5 and the sentence is unclear. Please make the appropriate corrections. Also numerous typographical errors were noted throughout Section 5. See next to alst bullet on page 5-1, the second and next to last bullet on page 5-3, and the partial sentence at the top of page 5-7, etc. Please make the appropriate corrections throughout Section 5.

The appropriate corrections have been made to the final report.

NCDENR Comments (January 6, 2011 and January 12, 2011, respectively)

1. Page 8-2, HHRS and ERS Section, second paragraph, first line: According to Section 7.3.2, metals should be added to the subsurface soil investigation.

Metals in subsurface soils did not pose a significant ecological risk; however, confirmation of the elevated metals was investigated as part of the Site 15 Expanded Site Inspection.

2. Appendix D: Please submit the results of the surface soil sampling for review.

The results of the surface soil sampling were submitted for NCDENR review on February 21, 2011. NCDENR responded via email indicating the data were received and no additional comments.
